

Each PRT66EM series reader can be used as a universal identification point connected to the access controller or configured for autonomous work, as a simple access controller for a single door. In the first case, the reader's functionality is limited only to reading an identi-

fier (card/PIN) and sending data to an external controller, which takes further action. In case of work in a standalone mode, PRT66EM terminals can independently supervise a single door using data entered in the process of their configuration.

Features:

- power supply 12 VDC
- EM 125 kHz cards
- programmable data output format: Wiegand 26-66bit, Magstripe (Clock and data), RS232, RACS (Roger)
- various ways of PIN and keypad codes transmission
- LED and Buzzer controlled through separate inputs
- outdoor installation (except PRT42EM)
- can be used for EMC-4 card programming (free of charge RARC software is required)
- programmed manually or from PC
- may operate as an offline standalone access controller
- 120 indexed users
- authentication: Card and/or PIN
- event log for 1024 transactions
- built-in programmable 1.5 A/30 V relay output
- two NO/NC inputs
- two transistor outputs
- operation with XM-2 I/O extension module
- possible connection of the external PRT series reader (two way door control)
- tamper
- average current consumption 45 mA
- reading distance up to 15 cm
- environmental conditions of operation:
 - temperature from -25°C to +60°C
 - humidity from 10% to 95%
- dimensions: 85.0 x 85.0 x 27.0 mm (height x width x thickness)
- weight: ≈120.0 g
- CE mark

Ordering guide

<i>Item</i>	<i>Description</i>
PRT66EM	EM 125 kHz outdoor proximity reader
