Door strike

Contactor/relay

PS20
Power Supply Unit
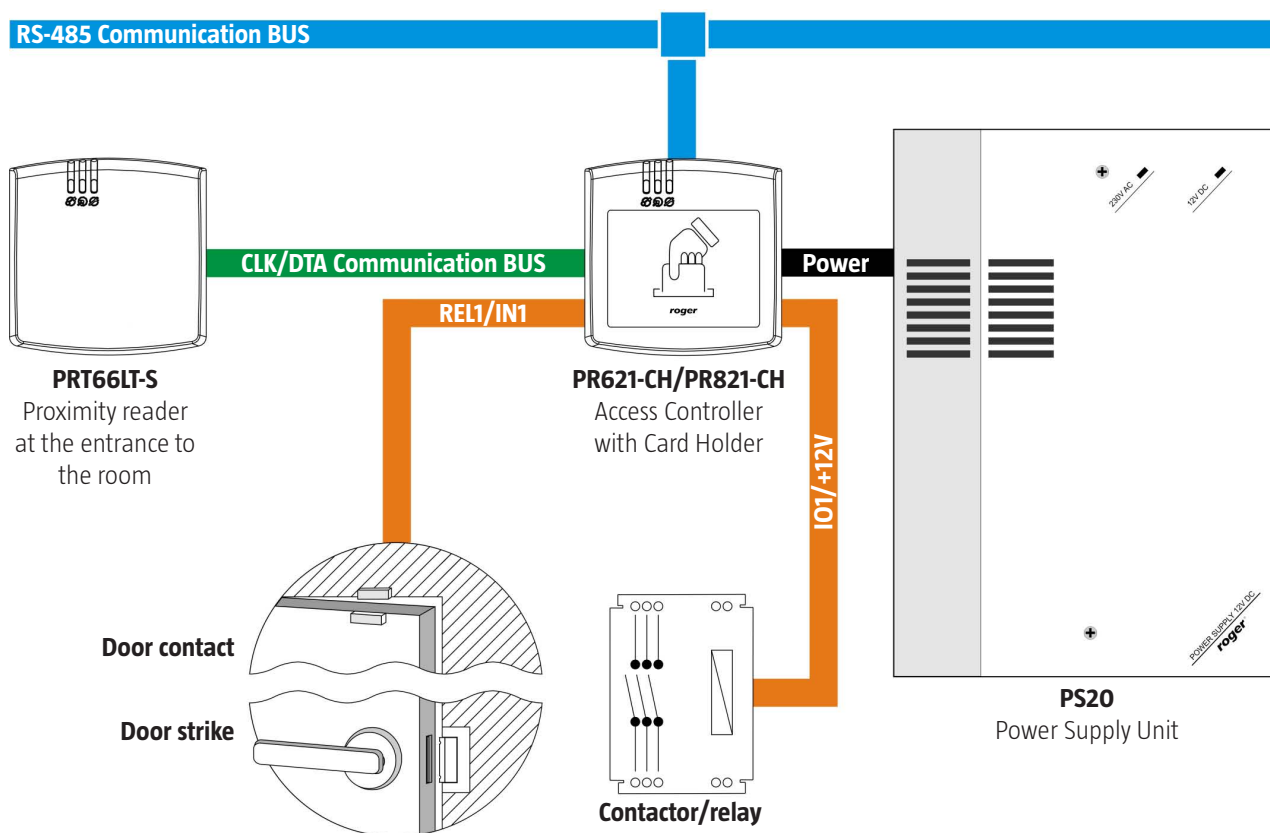

1. Diagram description

Schematic diagram represents exemplary access control installation and mains power supply switch in hotel room. The installation includes PRT66LT-S proximity reader operating as access terminal to the room and PR621-CH controller, which manages the access and enables switching of mains power supply inside the room.

2. Description of functions assigned to I/O lines

- **IN1** – Door contact (function [01]).
- **REL1** – Door strike (function [99]).
- **IO1** – Contactor control (function [73] or [74]).
