

Take Control of Your Keys Today and Far into the Future

RKDS – Electronic Key Management System
Security • Control • Efficiency

How Much Is Poor Key Control Costing Your Organization?

Take a look at a typical working day with and without electronic key management...

Without RKDS		With RKDS
A few minutes for every key issue, return, or search		Just a few seconds to issue or return a key
Several hours a day are lost just managing these processes		Minutes instead of hours
Hundreds of work-hours each year dedicated to key management		Minimal admin effort
Tens of thousands of euros in annual costs		Real budget savings starting right away
In practice: • you don't know who has a key • you cannot be sure it has been returned • employees waste time on record-keeping • the risk of losing keys and incurring additional costs increases		In practice: • you always know who picked up a key and who is responsible for it • full history available in your system • no manual record-keeping • an organized and secure process
Chaos, cost, and a lack of control		Full control, simplicity, and time saved every day

Return on investment with RKDS? It begins within the first few months of use.

What Changes When Your Keys Are Under Control?

You **don't** have to check. You **don't** have to search.
You **don't** have to ask. You **don't** have to guess.
You just **know**.

You're in control

Every key ends up exactly where it is supposed to be.
No exceptions.

You have clarity

You always know who picked up a key and when. It's simple.

You have time

Your team spends less time on record-keeping and more time getting work done.

You have peace of mind

The problems caused by lost keys and stressful unknowns just disappear.

You have a system ready for growth

The solution scales along with your organization.

Key Management Under Control

Why Does RKDS Work Better?

This isn't just another key cabinet. It is a solution designed from the ground up for the real workplace.

Built for Your Industry

“Before, the keys had a life of their own. Today, I know where they are, and who has them, at all times. The RKDS system has simply streamlined our daily work.”

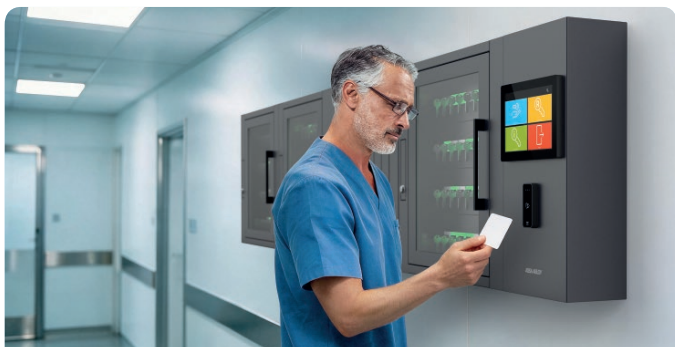

Jerzy Kosiński,

Deputy Head, Department of Security and Technical Protection, Polish Radio

See the RKDS system in action

Healthcare

Access control for keys to wards, labs, and rooms with medications or confidential records.

Only authorized personnel can retrieve them, and every operation is logged.

Industry and manufacturing

Keys to machines and technical areas are available without delay.

Staff retrieve them in seconds and continue their tasks.

Office and commercial buildings

No more key-collection lines at your front desk.

Employees and service personnel pick them up independently, freeing reception to focus on welcoming visitors.

Public institutions

Full control over keys to rooms, archives, and equipment.

Every pickup is assigned to a specific person, with total transparency.

Manage Keys, Not Problems

End the chaos, manual record-keeping, and lost keys.
