

The MCX16-AP is an expander that allows connection of the Aperio by ASSA ABLOY electronic door locks to the MC16 access controller. The access rules to doors equipped with Aperio locks are determined by the configuration of the access controller which furthermore records events which occurred on doors controlled by Aperio locks. The Aperio locks are connected to the MCX16-AP via the Aperio Ethernet HUB while the MCX16-AP expander is connected to the RS485 communication bus of the MC16 access controller.

Data Sheet MCX16-AP

Features:

- support for up to 16 Aperio wireless locks
- 8 inputs NO/NC
- 6 transistor outputs 12 V/1.0 A
- 2 relay outputs NO/NC 30 V/1.5A DC/AC
- power outputs 13.8 V/1.0 A and 13.8 V/0.2 A
- 24 VDC, 18 VAC, or 12 VDC power supply
- battery backup supply
- protection against full battery discharge
- RS485 to access controller
- Ethernet hub to Aperio system

Ordering guide	
Item	Description
MCX16-AP-2	I/O expander with interface to networked Aperio locks; license for 2 wireless locks
MCX16-AP-4	I/O expander with interface to networked Aperio locks; license for 4 wireless locks
MCX16-AP-8	I/O expander with interface to networked Aperio locks; license for 8 wireless locks
MCX16-AP-LIC-1	License extension for 1 Aperio wireless lock
