MCT82-FK-HR-F is a function key panel dedicated to use in a hotel room which is under control of the RACS 5 access control system and building automation. With the help of the panel, the hotel guest can control hotel room signalling: Do not disturb, Make up the room, Baggage and Catering. The current status of the signalling is presented on the function key LEDs indicators and on the room entry reader (if installed). The terminal requires a connection to an access controller that controls the system operation logic. Connection with the controller is via the addressable RS485 bus. The terminal can also be used to control other room functions (e.g. lights, heating, air conditioning, etc.), but in this case, the customer must specify the type of icons to be placed next to the function keys.

Features:

- 4 touch-type function keys
- 4 LEDs
- adjustable buzzer loudness
- automatic LED dimming when in standby
- connection to the controller through RS485
- 12 VDC supply
- tamper

- indoor operation only
- QUADRUS series product line
- flush type enclosure
- glass front panel
- dimensions: 105.0 x 105.0 mm (height x width)
- CE mark

Ordering guide	
Item	*Description*
MCT82-FK-HR-F	Function key panel for hotel room; touch type 4 function keys; 4 function LEDs; 12 V supply; QUADRUS series design; flush type enclosure
