

RACS 5

Access Management for Offices
and Commercial Buildings

Access Control That Brings Order to Modern Offices

Every office has access.

Not every office has full control over it.

Today's office environments are constantly evolving.

People come and go.

Teams change. Tenants change. Workstyles and responsibilities change.

What about your access control system?

Too often, it stays the same, even when the building has changed completely.

At some point, questions start to arise...

Is access across your facility:

Still consistent despite a growing number of changes?

Easy to manage without manual workarounds?

Just as organized as it will need to be a year or two from now?

If any of these questions are difficult to answer with confidence, the problem usually isn't the process but the tools.

RACS 5 – Built for the Long Term

„What matters most to me in day-to-day facility management is peace of mind, and RACS 5 delivers it. The system is stable, integrates seamlessly with other solutions, and makes access management a simple, intuitive process. It’s as natural as sending an email or answering a phone call.”

Jerzy Skraba,
Owner, TechHome
Technical Security Systems
Administrator

RACS 5 - An Enterprise-Class Access Control System for Offices and Commercial Buildings

Manages access across your entire facility in a structured, predictable way that adapts as your organization or building evolves.

What does this mean in practice?

Reliability Proven in Real-World Facilities

RACS 5 is chosen where access control needs to work today and continue to deliver value in the future.

3T Office Park Gdynia
